SITUATION SUMMARY

2015 Olympics World Games July 25, 2015 - August 2, 2015, Los Angeles County

- First Lady Michelle Obama is expected to attend the Opening Ceremony for the Special Olympics World Games Los Angeles 2015 which will be held at the Los Memorial Coliseum on Saturday, 07/25/15 at 1700 hours.
- The Los Angeles County Office of Emergency Management (OEM) began to monitor the event as 07/21/15 at 2300 hours. The OEM Duty Officer is working in coordination with the Special Olympics Committee Incident Command Post (ICP) and the LA City Emergency Management Department (EMD) and will send liaisons to the ICP as needed.
- The SREOC will remain activated at Level I, normal operational monitoring. The Territory Representative for Los Angeles County will provide support at the Los Angeles County EOC.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- Strong high pressure aloft will build in across the four corners region early next week and expand westward into California bringing very warm to hot conditions for much of southern California next week. The flow around the upper high will be conducive to draw in mid level moisture from northern Mexico and Arizona. This will increase the chances for thunderstorm activity and the potential for flash flooding across the local mountains and desert areas. There will be a small chance that some of these thunderstorms could drift into the valleys and coastal areas as well late next week.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Unseasonably low inland temperatures will continue through the weekend as an upper trough slides over the Pacific Northwest. Strong ridging will develop next week which will prolong dry weather and generate hot temperatures for inland areas. Coastal areas should remain slightly warmer than normal with persistent clouds and partial clearing each afternoon through the weekend.

Medford Weather:

Temperatures will cool and humidities will rise today and Sunday as a strong upper trough moves through. While this trough will be strong dynamically, forcing in the low levels will be rather weak, and only expect a slight chance for showers today, then a slight chance of showers and thunderstorms Sunday.

Reno Weather:

A drier air mass with seasonable temperatures will continue into the weekend. Typical afternoon zephyr breezes expected the next few days with stronger winds expected Sunday as the next trough approaches. Hazardous boating conditions and possible fire weather concerns are possible on Sunday afternoon.

San Francisco Weather:

A dry upper level trough will move across northern California over the weekend, maintaining mild temperatures through Sunday. Behind the departing trough, locally brisk northerly winds will develop in the hills from late Sunday through Monday night. Much warmer weather is then forecast for next week as a strong upper level high pressure ridge builds across the southwestern United States.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Dry weather is expected across the area through next week except a slight chance of showers northern Shasta County Sunday evening. Daytime temperatures will be slightly below normal through the weekend climbing to above normal by early next week. Triple digit heat is expected throughout the Central Valley for mid to late next week.

Hanford Weather:

A dry westerly flow aloft will provide Central California with mainly clear skies and near normal temperatures through early next week. High pressure will then build westward by the middle of next week and bring us warmer temperatures. A few thunderstorms will be possible in desert and mountain locations by Thursday as moisture is pulled northward around the expanding high pressure area.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Low pressure passing to the north Sunday into Monday will bring night through morning low clouds for coast and a few coastal valleys through Monday morning. Strong high pressure aloft is expected to build bringing potential triple digit heat by mid-week through late next week. There will also be the possible return of the monsoon later next week as well introducing the slight chance of thunderstorms to the mountains and Antelope Valley.

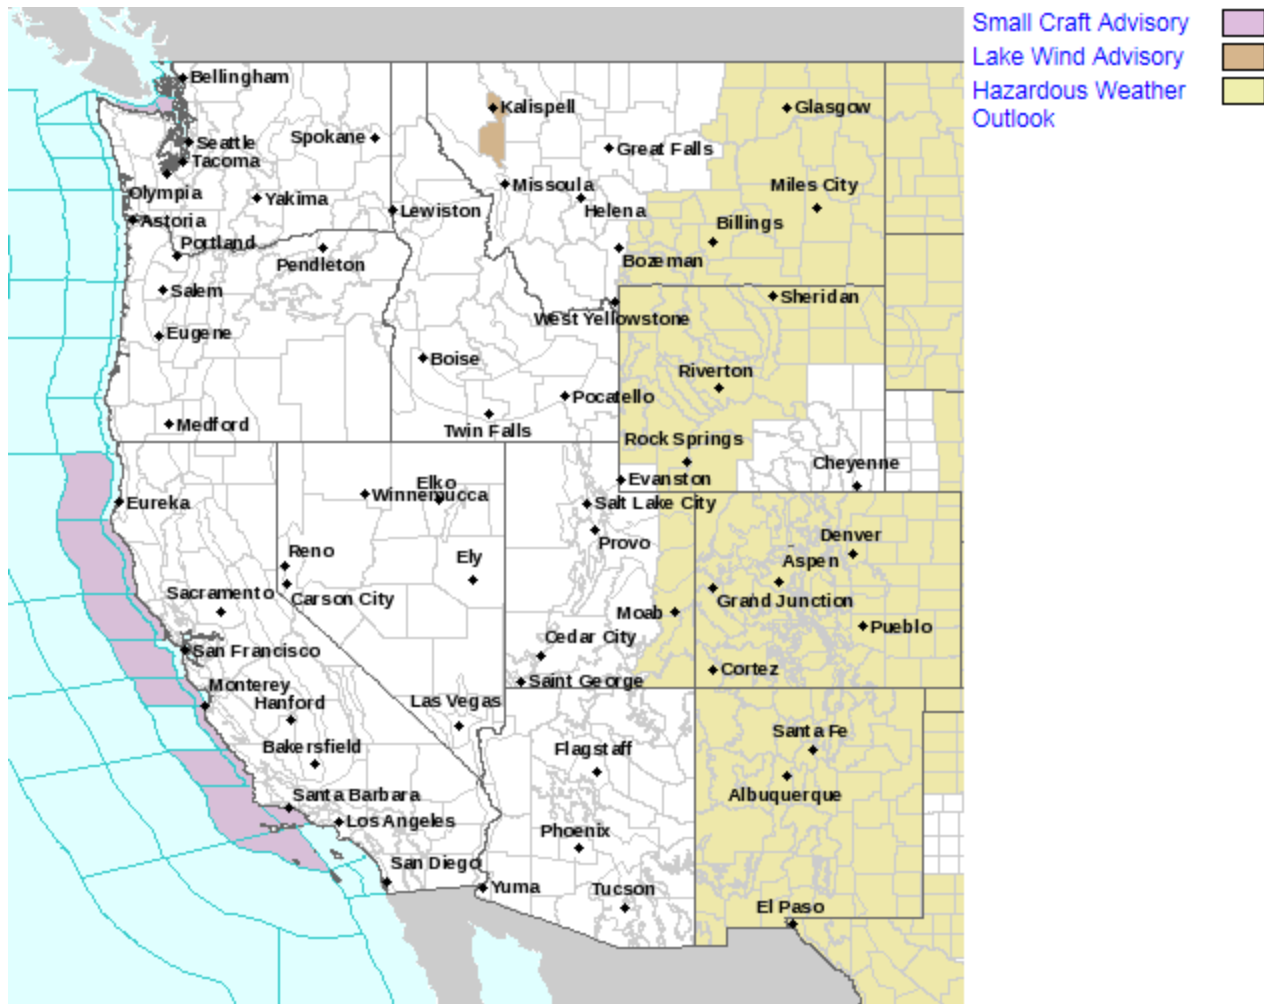

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Through Tuesday, a trough of low pressure moving inland through the Pacific Northwest will maintain dry southwest flow aloft. The marine layer and onshore flow will bring areas of night and morning low clouds and patchy fog extending into portions of the inland valleys at times. High temperatures will be near to slightly below average with gusty west winds the in the mountains and deserts during the late afternoon through late evening.

Southeast California Weather:

Slightly drier air will arrive this weekend with a return to a more typical moist monsoon regime expected by the middle of next week. Temperatures will remain near or slightly below normal.
